## **COMPARISON TO PREVIOUS ISSUE**

Issue EDSD04 of 1 June 2005:

- Upgrade to UN/EDIFACT Code list D.04B

12 May 2004 : EDIFIX 5.0 Technical Upgrade

- The 'KMT' qualifier in SEG QTY DE 6411 is now defined as (\*) EDIFICE code. UN/ECE Recommendation 20 specifies 'KTM' as qualifier for 'kilometre'.

21 May 2003:

- SG14 – RFF – C506 EDIFICE Utilisation changed from 'R' to 'M' according to the UN/EDIFACT specification – this does not influence the functionality of the message.
- EDIFIX 4.2 Technical upgrade; review and correction of examples

Issue EDFI02 of 13 November 2002 is based on UN/EDIFACT D97.A / Code List D01.A

- Addition of the following code value:
  - o SG9, LIN segment, CO C212, DE 7143 code 'SRV' EAN.UCC Global Trade Item Number
  - o SG9, PIA segment, CO C212, DE 7143 code 'SRV' EAN.UCC Global Trade Item Number

Issue EDFI01 of 29 May 2002 – addition of recommended set of DTM qualifiers

## **EDIFICE FUNCTIONAL DEFINITION**

### **Business flow diagram**

Three simplified business scenarios commonly found in materials supply chains are presented here, featuring usage of the INVRPT message.

#### **Forecast based Supplier Managed Inventory requiring consumption data.**

(This is used to implement Kanban supply chains)

The buyer sends his supplier regular gross forecasts for his anticipated production requirements, typically using a weekly DELFOR message.

Additionally, the buyer sends an INVRPT message more frequently (typically daily) to the supplier, detailing his current level of stock, new products received into inventory, and quantities which have been consumed by his production. From this data, the supplier calculates schedules and delivers product to maintain the level of inventory defined by the buyer.

Change of ownership of the product occurs when the product is received by the buyer.

#### **Forecast based Supplier Managed Inventory under Consignment**

(This is often referred to as consignment stock held by the buyer)

The buyer sends his supplier regular gross forecasts for his anticipated production requirements, typically using a weekly DELFOR message.

In this DELFOR message the buyer can include all additional details needed by the seller to calculate schedules and deliver product to the buyer's site, in order for the seller to control and maintain the desired level of inventory.

Change of ownership of the product occurs when the product is consumed from inventory by the buyer.

Since this consigned inventory, held remotely, is still owned by the seller, the seller may require more frequent information (daily, for example) concerning his inventory. In this case the data may be sent by using an INVRPT message.

### Consignment Inventory held in a third party warehouse

(This is often referred to as the Vendor Hub scenario)

The buyer sends his supplier regular gross forecasts for his anticipated production requirements, typically using a weekly DELFOR message

A remote consignment warehouse, operated by a third party, is stocked by the supplier according to the buyer's forecasted production. The level of inventory is controlled and maintained by the seller. Independently, the buyer communicates his immediate product delivery requirements to the consignment warehouse operator, typically by using a DELJIT message.

Change of ownership of the product occurs when the product is delivered by the third party warehouse to the buyer.

This consigned inventory, held remotely, is still owned by the seller. In order to replenish the stock correctly, the third party warehouse operator must inform the supplier of activities concerning the inventory. This is performed by using the INVRPT.

### Principles

The EDIFACT Inventory Report Message (INVRPT) is used to exchange information relevant to held inventories and which is of interest to the trading partners.

In a materials management environment, the INVRPT may result from monitoring and tracking inventory movements. It is used to inform the seller of the inventory status and movements, within appropriate time frames.

**BRANCHING DIAGRAM**

## **SEGMENT GROUPS/SEGMENTS DESCRIPTION**

### **UNH MESSAGE HEADER**

---

Function: A service segment heading, and uniquely identifying the message.  
Usage: M1

### **BGM BEGINNING OF MESSAGE**

---

Function: A segment uniquely identifying the message by means of its coded name, number and function.  
Usage: M1

### **DTM DATE/TIME/PERIOD**

---

Function: A segment specifying the date/time of creation of the message.  
Usage: M1

### **SG2 NAD-LOC-SG3-SG4**

---

---

Function: A group of segments identifying the parties involved and their associated information, relevant to the whole message.

Usage: R..3

Notes: SG3 is used if EC regulations and/or country law requires reference numbers to be sent.  
If the LOC segment is used in SG2, it may be overridden by the information specified in LOC of SG11.

### **NAD NAME AND ADDRESS**

---

Function: A segment identifying the function and coded identification, name and address of a party involved.  
Usage: M1

### **LOC PLACE/LOCATION IDENTIFICATION**

---

Function: A segment identifying a location or place required for the inventory concerned, relevant to the specified party.  
Usage: O1

### **SG3 RFF**

---

---

Function: A group of segments specifying references relating to the specified party.

Usage: D..2

Notes:

### **RFF REFERENCE**

---

Function: A segment specifying a company specific reference.  
Usage: M1

### **SG4 CTA-COM**

---

---

Function: A group of segments giving contact details of the specific person or department within the identified party involved, to whom communication should be directed.

Usage: O1

Notes:

### **CTA CONTACT INFORMATION**

---

Function: A segment identifying a person or department, and their function.  
Usage: M1

### **COM COMMUNICATION CONTACT**

---

Function: A segment identifying a communications type and number.  
Usage: O..3

### **SG5 CUX**

---

---

Function: A group of segments specifying the currency valid for the whole message.

Usage: D 1  
 Notes: SG5 is only used when the billing currency for consignment stock needs to be identified, though the price itself is not necessary. Withdrawals of products requiring different currencies require separate reports. For status-only reports, the currency would not be used.

**CUX CURRENCIES**

---

Function: A segment specifying the currency of the account.  
 Usage: M1

**SG9 LIN-PIA-SG10-SG11**

---

Function: A group of segments providing inventory details of the individual line items i.e. products kept in inventory.  
 Usage: R..9999  
 Notes: SG10 is used when document references need to be specified.

**LIN LINE ITEM**

---

Function: A segment identifying a line item by its item number, and agreed to be the primary reference number between the buyer and seller.  
 The segment also carries a sequence number assigned to the line item within the message.  
 Usage: M1

**PIA ADDITIONAL PRODUCT ID**

---

Function: A segment providing additional identification numbers for the line item.  
 Usage: D..10

**SG10 RFF-DTM**

---

Function: A group of segments specifying references for the line item.  
 Usage: D..4  
 Notes: The DTM segment must be sent where local law requires the date of a reference document to be sent.

**RFF REFERENCE**

---

Function: A segment specifying a document reference number and its appropriate line number.  
 Usage: M1

**DTM DATE/TIME/PERIOD**

---

Function: A segment specifying the date/time of the reference document.  
 Usage: D 1

**SG11 INV-QTY-GIN-LOC-DTM-SG12-SG14**

---

Function: A group of segments providing a quantity with all inventory management related information for the line item.  
 Usage: R..9999  
 Notes: This matrix shows how INV and QTY are used. For each inventory status, the date/time should be specified.

The GIN segment is used when goods identity numbers need to be specified.  
 SG12 is used when the owner of the inventory needs to be specified.

Status of Inventory	INV		QTY	DTM
	DE 4499	DE 4503	DE 6063	
Snapshot	-	1/2	17/89	*
Incoming	1	-	48	*
Outgoing	11/2	-	2	*
Returns	8	-	61	*
Corrections	7	-	213/214	*

**INV INVENTORY MANAGEMENT RELATED DETAILS**

---

Function: A segment specifying the reason for an inventory movement or the inventory status.

Usage: M1

---

**QTY QUANTITY**

Function: A segment specifying a quantity.  
Usage: M1

---

**GIN GOODS IDENTITY NUMBER**

Function: A segment providing identity numbers.  
Usage: D..100

---

**LOC PLACE/LOCATION IDENTIFICATION**

Function: A segment identifying a location or place required for the inventory concerned.  
Usage: O..2

---

**DTM DATE/TIME/PERIOD**

Function: A segment specifying the date/time as applied to the quantity.  
Usage: R 1

---

**SG12 NAD**

Function: A group of segments identifying the owner of the inventory.  
Usage: D 1  
Notes:

---

**NAD NAME AND ADDRESS**

Function: A segment identifying the owner of the inventory.  
Usage: M1

---

**SG14 RFF-DTM**

Function: A group of segments giving references only relating to the specified quantity.  
Usage: R..3  
Notes:

---

**RFF REFERENCE**

Function: A segment specifying a document reference number and its appropriate line number, identifying the quantity received or consumed from inventory.  
Usage: M1

---

**DTM DATE/TIME/PERIOD**

Function: A segment specifying the date/time of the reference document.  
Usage: O 1

---

**UNT MESSAGE TRAILER**

Function: A service segment ending, and providing information for checking the completeness of a message.  
Usage: M1

## SEGMENT DETAILS

### UNH MESSAGE HEADER

Function: A service segment heading, and uniquely identifying the message.

Usage : M1

Notes : Refer to EDIFICE Utilisation of the UN/EDIFACT Service Segments, Issue EDSS04

Ref.	Rep.	Name		EDIFICE Utilisation
0062	an..14	M MESSAGE REFERENCE NUMBER	M	Transmission message count from 1
S009		M MESSAGE IDENTIFIER	M	
0065	an..6	M Message type identifier	M	INVRPT = Inventory report message
0052	an..3	M Message type version number	M	D = Draft version/UN/EDIFACT Directory
0054	an..3	M Message type release number	M	97A = Release 1997 - A
0051	an..2	M Controlling agency	M	UN = UN/CEFACT

**SG2 NAD-LOC-SG3-SG4**

**NAD NAME AND ADDRESS**

Function: A segment identifying the function and coded identification, name and address of a party involved.

Usage : M1

Notes : It is advised that the party identification CO C082 be used. When CO C082 cannot be used it is recommended to use the structured name and address CO C080 through DE 3207 rather than the unstructured one CO C058.  
The seller and the party holding the inventory must be specified.

Ref.	Rep.	Name		EDIFICE Utilisation
3035	an..3	M PARTY QUALIFIER	M	BY = Buyer SE = Seller DP = Delivery party Party holding the inventory, if different from buyer or seller.
C082		C PARTY IDENTIFICATION DETAILS	A	
3039	an..35	M Party id. identification	M	
1131	an..3	C Code list qualifier	N	9 = EAN (International Article Numbering association) 16 = DUNS (Dun & Bradstreet) 91 = Assigned by seller or seller's agent 92 = Assigned by buyer or buyer's agent
3055	an..3	C Code list responsible agency, coded	R	
C058		C NAME AND ADDRESS	D	
3124	an..35	M Name and address line	M	
3124	an..35	C Name and address line	O

3232	an..70	C Related place/location two	N	
5479	an..3	C RELATION, CODED	N	

**SG3 RFF****RFF REFERENCE**

Function: A segment specifying a company specific reference.

Usage : M1

Notes :

Ref.	Rep.	Name		EDIFICE Utilisation
C506		M REFERENCE	M	VA = VAT registration number GN = Government reference number
1153	an..3	M Reference qualifier	M	
1154	an..35	C Reference number	R	
1156	an..6	C Line number	N	
4000	an..35	C Reference version number	N	

**SG4 CTA-COM****CTA CONTACT INFORMATION**

Function: A segment identifying a person or department, and their function.

Usage : M1

Notes :

Ref.	Rep.	Name	EDIFICE Utilisation	
3139	an..3	C CONTACT FUNCTION, CODED	R	IC = Information contact If a code is available use DE 3413, otherwise use DE 3412.
C056		C DEPARTMENT OR EMPLOYEE DETAILS	R	
3413	an..17	C Department or employee identification	D	
3412	an..35	C Department or employee	D	

**SG4 CTA-COM****COM COMMUNICATION CONTACT**

Function: A segment identifying a communications type and number.

Usage : 0..3

Notes :

Ref.	Rep.	Name		EDIFICE Utilisation
C076		M COMMUNICATION CONTACT	M	
3148	an..512	M Communication number	M	
3155	an..3	M Communication channel qualifier	M	EM = Electronic mail FX = Telefax TE = Telephone

**SG5 CUX**

**CUX CURRENCIES**

Function: A segment specifying the currency of the account.

Usage : M1

Notes :

Ref.	Rep.	Name		EDIFICE Utilisation
C504		C CURRENCY DETAILS	R	
6347	an..3	M Currency details qualifier	M	7 = Currency of the account
6345	an..3	C Currency, coded	R	Use ISO 4217, 3 alpha code

EXAMPLE 2

Forecast based supplier managed inventory under consignment, often referred to as consignment stock held by the buyer.

The buyer sends an INVRPT to the supplier, detailing his current level of stock, new products received into inventory, quantities which have been consumed by his production, corrections for consumption and receiving errors, and defective products to be returned. The information necessary for self-billing is also specified.
