EDIFICE PIP Implementation Guideline

PIP® 5C4 Registration Status Notification V.01.04.00

Issue EPIG5C4_V01_04_00_RegistrationStatusNotification ED01

Element / Attribute	Usage	Description	
Pip5C4RegistrationStatusNotification			
1 DesignStatusNotification	**1..1**	Definition:	The collection of business properties that describe design status notification information.
		Note:	The PIP specifies the choice between Core Product structure (described in one data sheet) and Device structure (orderable parts). The actual choice of the structure to be used is recommended by the Supplier.
2 DesignRegistrationInformation	**1..unbounded**	Definition:	The collection of business properties that describe a product's registration requirements for a Design Win process.
3 designEngagementDate	**0..1**	Definition:	The date a product design is approved and/or expires for a supplier.
		Constraint:	Mandatory when GlobalRegistrationStatusCode is equal to "Accepted".
		Note:	Optional - validity period of the design
3 DatePeriod	**1..1**	Definition:	The collection of business properties that specify the number of days by a start and end date stamp.
4 beginDate	**1..1**	Definition:	The start date of a date period.
		Constraint:	Mandatory when GlobalRegistrationStatusCode is equal to "Accepted".
4 DateStamp	**1..1**	Definition:	Specifies a specific date. Date stamp based on the ISO 8601 specification. The "Z" following the day identifier (DD) is used to indicate Coordinated Universal Time. Informal format: YYYYMMDDZ
5 endDate	**1..1**	Definition:	The end date of a date period.
		Constraint:	Mandatory when GlobalRegistrationStatusCode is equal to "Accepted".
5 DateStamp	**1..1**	Definition:	Specifies a specific date. Date stamp based on the ISO 8601 specification. The "Z" following the day identifier (DD) is used to indicate Coordinated Universal Time. Informal format: YYYYMMDDZ

Element / Attribute	Usage	Description	
6 DesignProjectInformation	**1..1**	Definition:	The collection of business properties that compose a product design project.
7 DesignAssemblyInformation	**1..unbounded**	Definition:	The collection of business properties that describe a product design board / assembly.
8 assemblyComments	**0..1**	Definition:	Free form textual description regarding product assembly information.
		Note:	Provided by provider
8 FreeFormText	**1..1**	Definition:	Unformatted text.
9 demandCreatorTrackingIdentifier	**1..1**	Definition:	The proprietary unique identifier that represents a design registration request for a Demand Creator.
		Note:	Assembly identifier provided by Requestor - ref of assembly/part of the requestor eg ref name of a board
9 ProprietaryReferenceIdentifier	**1..1**	Definition:	A unique reference identifier for goods, services or business documents.
10 DesignPartInformation	**0..unbounded**	Definition:	The collection of business properties that describe a product part for a product design registration.
12 CoreProductRegistration		Definition:	The collection of business properties that describe the registration of a core product.
		Note:	The PIP specifies the choice between Core Product structure (described in one data sheet) and Device structure (orderable parts). The actual choice of the structure to be used is recommended by the Supplier. Core data block
14 DeviceProductRegistration	**0..unbounded**	Definition:	The collection of business properties that describe the registration of a core product.
		Note:	Device within core
23 ProductIdentification	**1..1**	Definition:	The collection of business properties that describe proprietary and global identifier information regarding a product.
		Constraint:	One instance of either "GlobalProductIdentifier" or "PartnerProductIdentification" is mandatory.

Element / Attribute	Usage	Description
25 PartnerProductIdentification	**0..unbounded**	**Definition:** The collection of business properties that describe proprietary part information.
26 GlobalPartnerClassificationCode	**1..1**	**Definition:** Code identifying a partner's function in the supply chain.
	Restricted Entity Instance	
	Manufacturer	Product manufacturer in supply chain.
27 ProprietaryProductIdentifier	**1..1**	**Definition:** An internal identifier used to identify a product.
		Note: Manufacturer Part Number
28 revisionIdentifier	**0..1**	**Definition:** Free form text that identifies a revision to a proprietary serial number.
28 FreeFormText	**1..1**	**Definition:** Unformatted text.
29 productProviderLeadDescription	**0..1**	**Definition:** Description of a lead generated by the product provider and provided to the demand creator.
29 FreeFormText	**1..1**	**Definition:** Unformatted text.
30 productProviderLeadTrackingIdentifier	**0..1**	**Definition:** A proprietary identifier communicated from the product provider to the demand creator for the purpose of identifying and tracking supplier generated leads.
30 ProprietaryReferenceIdentifier	**1..1**	**Definition:** A unique reference identifier for goods, services or business documents.
31 RegistrationStatus	**1..1**	**Definition:** The collection of business properties that describe the registration status of a product.
		Note: Registration status for core structure at device level
32 DesignWinStatusReasonCode	**0..1**	**Definition:** Code identifying the reason for the disposition of a Design Registration Request or the status of a particular Design Registration assigned by the product provider or requested by the demand creator.

Element / Attribute	Usage	Description	
33 **designWinStatusReasonCodeExplanation**	0..1	Definition:	Further explanation provided by the Product Provider or the Demand Creator to clarify/explain the particular DesignWinStatusReasonCode.
		Constraint:	DesignWinStatusReasonCode must be present in order to include designWinStatusReasonCodeExplanation. FreeFormText and the data present in designWinStatusReasonCodeExplanation.FreeFormText must relate directly to the DesignWinStatusReasonCode indicated.
33 **FreeFormText**	1..1	Definition:	Unformatted text.
34 **GlobalRegistrationStatusCode**	1..1	Definition:	Code identifying the registration status of a design; namely, the acknowledgment, collaboration and continuation on the submitted supplier part business opportunity between a supplier (manufacture representative) and a distributor.
35 **registrationStatusDate**	1..1	Definition:	The date stamp when the registration status was generated.
35 **DateStamp**	1..1	Definition:	Specifies a specific date. Date stamp based on the ISO 8601 specification. The "Z" following the day identifier (DD) is used to indicate Coordinated Universal Time. Informal format: YYYYMMDDZ
36 **suggestedResalePrice**	0..1	Definition:	Represents the suggested market price the customer should pay the distributor for the product.
		Note:	used by some partners - provider suggested price to requestor
36 **ProductPricing**	1..1	Definition:	The collection of business properties that describe the type of pricing and financial amount for a product.
37 **FinancialAmount**	1..1	Definition:	The collection of business properties that describe the monetary amount defined by a specified currency.
38 **GlobalCurrencyCode**	1..1	Definition:	Code identifying the three character currency code specified in ISO 4217-1995.
41 **MonetaryAmount**	1..1	Definition:	Magnitude of currency amount.
42 **GlobalPriceTypeCode**	1..1	Definition:	Code identifying the pricing qualifier for a product.
Restricted Entity Instance			
Suggested Resale Price		The recommended resale price; including MSRP.	

5C4_RegistrationStatusNotification; V01_04_00; ED01

© EDIFICE 2005

Issue date   13/10/2005
Publication date   06/12/2005

Element / Attribute	Usage	Description	
50 ProductIdentification	1..1	Definition:	The collection of business properties that describe proprietary and global identifier information regarding a product.
		Constraint:	One instance of either "GlobalProductIdentifier" or "PartnerProductIdentification" is mandatory.
		Note:	If the Core structure is used, this block is used to identify the Core product
52 PartnerProductIdentification	0..unbounded	Definition:	The collection of business properties that describe proprietary part information.
53 GlobalPartnerClassificationCode	1..1	Definition:	Code identifying a partner's function in the supply chain.
	Restricted Entity Instance		
	Manufacturer		Product manufacturer in supply chain.
54 ProprietaryProductIdentifier	1..1	Definition:	An internal identifier used to identify a product.
		Note:	Manufacturer core product
56 productProviderLeadDescription	0..1	Definition:	Description of a lead generated by the product provider and provided to the demand creator.
56 FreeFormText	1..1	Definition:	Unformatted text.
57 productProviderLeadTrackingIdentifier	0..1	Definition:	A proprietary identifier communicated from the product provider to the demand creator for the purpose of identifying and tracking supplier generated leads.
57 ProprietaryReferenceIdentifier	1..1	Definition:	A unique reference identifier for goods, services or business documents.
58 registrationBonusPercent	0..1	Definition:	The amount that the manufacturer will pay the distributor upon successfully winning a design expressed as a percentage.
59 RegistrationStatus	1..1	Definition:	The collection of business properties that describe the registration status of a product.
		Note:	Registration status block at core level It is recommended to use this block for the supplier to inform about the current status

Element / Attribute	Usage	Description	
60 DesignWinStatusReasonCode	0..1	Definition:	Code identifying the reason for the disposition of a Design Registration Request or the status of a particular Design Registration assigned by the product provider or requested by the demand creator.
61 designWinStatusReasonCodeExplanation	0..1	Definition:	Further explanation provided by the Product Provider or the Demand Creator to clarify/explain the particular DesignWinStatusReasonCode.
		Constraint:	DesignWinStatusReasonCode must be present in order to include designWinStatusReasonCodeExplanation. FreeFormText and the data present in designWinStatusReasonCodeExplanation.FreeFormText must relate directly to the DesignWinStatusReasonCode indicated.
61 FreeFormText	1..1	Definition:	Unformatted text.
62 GlobalRegistrationStatusCode	1..1	Definition:	Code identifying the registration status of a design; namely, the acknowledgment, collaboration and continuation on the submitted supplier part business opportunity between a supplier (manufacture representative) and a distributor.
63 registrationStatusDate	1..1	Definition:	The date stamp when the registration status was generated.
63 DateStamp	1..1	Definition:	Specifies a specific date. Date stamp based on the ISO 8601 specification. The "Z" following the day identifier (DD) is used to indicate Coordinated Universal Time. Informal format: YYYYMMDDZ
64 suggestedResalePrice	0..1	Definition:	Represents the suggested market price the customer should pay the distributor for the product.
		Note:	used by some partners - provider suggested price to requestor
64 ProductPricing	1..1	Definition:	The collection of business properties that describe the type of pricing and financial amount for a product.
65 FinancialAmount	1..1	Definition:	The collection of business properties that describe the monetary amount defined by a specified currency.
66 GlobalCurrencyCode	1..1	Definition:	Code identifying the three character currency code specified in ISO 4217-1995.

Element / Attribute	Usage	Description	
69 MonetaryAmount	**1..1**	Definition:	Magnitude of currency amount.
70 GlobalPriceTypeCode	**1..1**	Definition:	Code identifying the pricing qualifier for a product.
71 DeviceProductRegistration		Definition:	The collection of business properties that describe the registration of a core product.
		Note:	The PIP specifies the choice between Core Product structure (described in one data sheet) and Device structure (orderable parts). The actual choice of the structure to be used is recommended by the Supplier. If the Device structure is used, this block is used to identify the Device
80 ProductIdentification	**1..1**	Definition:	The collection of business properties that describe proprietary and global identifier information regarding a product.
		Constraint:	One instance of either "GlobalProductIdentifier" or "PartnerProductIdentification" is mandatory.
82 PartnerProductIdentification	**0..unbounded**	Definition:	The collection of business properties that describe proprietary part information.
83 GlobalPartnerClassificationCode	**1..1**	Definition:	Code identifying a partner's function in the supply chain.
	Restricted Entity Instance		
	Manufacturer		Product manufacturer in supply chain.
84 ProprietaryProductIdentifier	**1..1**	Definition:	An internal identifier used to identify a product.
		Note:	Manufacturer part number
85 revisionIdentifier	**0..1**	Definition:	Free form text that identifies a revision to a proprietary serial number.
85 FreeFormText	**1..1**	Definition:	Unformatted text.
86 productProviderLeadDescription	**0..1**	Definition:	Description of a lead generated by the product provider and provided to the demand creator.
		Note:	Manufacturer identify opportunity to Disti
86 FreeFormText	**1..1**	Definition:	Unformatted text.

Element / Attribute	Usage	Description	
87 productProviderLeadTrackingIdentifier	**0..1**	Definition:	A proprietary identifier communicated from the product provider to the demand creator for the purpose of identifying and tracking supplier generated leads.
		Note:	the manufacturer identified opportunity to distributor
87 ProprietaryReferenceIdentifier	**1..1**	Definition:	A unique reference identifier for goods, services or business documents.
89 RegistrationStatus	**1..1**	Definition:	The collection of business properties that describe the registration status of a product.
		Note:	Registration status block at core level It is recommended to use this block for the supplier to inform about the current status
90 DesignWinStatusReasonCode	**0..1**	Definition:	Code identifying the reason for the disposition of a Design Registration Request or the status of a particular Design Registration assigned by the product provider or requested by the demand creator.
		Note:	Mandatory if denied or pending for globalRegistrationStatusCode
91 designWinStatusReasonCodeExplanation	**0..1**	Definition:	Further explanation provided by the Product Provider or the Demand Creator to clarify/explain the particular DesignWinStatusReasonCode.
		Constraint:	DesignWinStatusReasonCode must be present in order to include designWinStatusReasonCodeExplanation. FreeFormText and the data present in designWinStatusReasonCodeExplanation.FreeFormText must relate directly to the DesignWinStatusReasonCode indicated.
91 FreeFormText	**1..1**	Definition:	Unformatted text.
92 GlobalRegistrationStatusCode	**1..1**	Definition:	Code identifying the registration status of a design; namely, the acknowledgment, collaboration and continuation on the submitted supplier part business opportunity between a supplier (manufacture representative) and a distributor.
93 registrationStatusDate	**1..1**	Definition:	The date stamp when the registration status was generated.

Element / Attribute	Usage	Description	
93 DateStamp	1..1	Definition:	Specifies a specific date. Date stamp based on the ISO 8601 specification. The "Z" following the day identifier (DD) is used to indicate Coordinated Universal Time. Informal format: YYYYMMDDZ
94 suggestedResalePrice	0..1	Definition:	Represents the suggested market price the customer should pay the distributor for the product.
		Note:	used by some partners - provider suggested price to requestor
94 ProductPricing	1..1	Definition:	The collection of business properties that describe the type of pricing and financial amount for a product.
95 FinancialAmount	1..1	Definition:	The collection of business properties that describe the monetary amount defined by a specified currency.
96 GlobalCurrencyCode	1..1	Definition:	Code identifying the three character currency code specified in ISO 4217-1995.
99 MonetaryAmount	1..1	Definition:	Magnitude of currency amount.
100 GlobalPriceTypeCode	1..1	Definition:	Code identifying the pricing qualifier for a product.
		Note:	average
Restricted Entity Instance			
Suggested Resale Price		The recommended resale price; including MSRP.	
101 demandCreatorTrackingIdentifier	1..1	Definition:	The proprietary unique identifier that represents a design registration request for a Demand Creator.
		Note:	Project identification number assigned by distributor
101 ProprietaryReferenceIdentifier	1..1	Definition:	A unique reference identifier for goods, services or business documents.
102 DesignRegistrationIdentification	0..1	Definition:	The collection of business properties that describe design registration identification.
		Note:	Optional

5C4_RegistrationStatusNotification; V01_04_00; ED01

Issue date   13/10/2005
Publication date   06/12/2005

Element / Attribute	Usage	Description	
103 designRegistrationIdentifier	0..1	Definition:	A proprietary unique identifier for a design registration.
		Constraint:	Mandatory when GlobalRegistrationStatusCode is equal to "Approved".
		Note:	Project identification number assigned by supplier at part level
103 ProprietaryReferenceIdentifier	1..1	Definition:	A unique reference identifier for goods, services or business documents.
		Note:	Number assigned by provider
104 designRegistrationRevision	0..1	Definition:	Indicates a new or updated design registration.
		Constraint:	Mandatory if GlobalDesignRegistrationNotificationCode is "Update".
		Note:	e.g. sequential number
104 RevisionNumber	1..1	Definition:	An incremental number used to identify changes.
105 effectiveRegistrationDate	0..1	Definition:	The date registration becomes effective.
		Note:	Optional - validity period of the part inside the design
105 DatePeriod	1..1	Definition:	The collection of business properties that specify the number of days by a start and end date stamp.
		Note:	Date defined by supplier for the validity period of the Design registration
106 beginDate	1..1	Definition:	The start date of a date period.
		Constraint:	Mandatory when GlobalRegistrationStatusCode is equal to "Accepted".
106 DateStamp	1..1	Definition:	Specifies a specific date. Date stamp based on the ISO 8601 specification. The "Z" following the day identifier (DD) is used to indicate Coordinated Universal Time. Informal format: YYYYMMDDZ
107 endDate	0..1	Definition:	The end date of a date period.
		Constraint:	Mandatory when GlobalRegistrationStatusCode is equal to "Accepted".

Element / Attribute	Usage	Description	
107 DateStamp	1..1	**Definition:**	Specifies a specific date. Date stamp based on the ISO 8601 specification. The "Z" following the day identifier (DD) is used to indicate Coordinated Universal Time. Informal format: YYYYMMDDZ
108 GlobalDesignRegistrationNotificationCode	1..1	**Definition:**	Code identifying the purpose of a design registration notification, e.g. an initial notification or an update.
		Restricted Entity Instance	
		Initial	The first-time response or notification regarding design registration status.
		Update	An updated response or notification regarding design registration status.
112 productProviderComments	0..1	**Definition:**	Free form textual description provided for Product Provider.
		Note:	Comment from provider to requestor about this part
112 FreeFormText	1..1	**Definition:**	Unformatted text.
113 productProviderFieldApplicationEngineer	0..1	**Definition:**	The product provider Field Application Engineer.
		Note:	This block identifies the Manufacturer FAE responsible for this product
113 ContactInformation	1..1	**Definition:**	The collection of business properties that provide communication and address information for contacting a person, organization or business.
114 contactName	1..1	**Definition:**	Name of the contact person(s) within the organization.
114 FreeFormText	1..1	**Definition:**	Unformatted text.
115 EmailAddress	0..1	**Definition:**	Electronic mail address.
		Note:	Mandatory
132 telephoneNumber	0..1	**Definition:**	The numerical schema designed to achieve contact via telephone.
		Note:	Mandatory
132 CommunicationsNumber	1..1	**Definition:**	The electro-technical communication number, e.g., telephone number, facsimile number, pager number.

Element / Attribute	Usage	Description	
133 productProviderSalesRepresentative	**0..1**	Definition:	The product provider sales representative.
		Note:	This block identifies the Manufacturer SalesRep responsible for this product
133 ContactInformation	**1..1**	Definition:	The collection of business properties that provide communication and address information for contacting a person, organization or business.
134 contactName	**1..1**	Definition:	Name of the contact person(s) within the organization.
134 FreeFormText	**1..1**	Definition:	Unformatted text.
135 EmailAddress	**0..1**	Definition:	Electronic mail address.
		Note:	Mandatory
152 telephoneNumber	**0..1**	Definition:	The numerical schema designed to achieve contact via telephone.
		Note:	Mandatory
152 CommunicationsNumber	**1..1**	Definition:	The electro-technical communication number, e.g., telephone number, facsimile number, pager number.
153 productProviderTrackingIdentifier	**1..1**	Definition:	The proprietary unique identifier that represents a design registration request for a Product Provider.
		Note:	Project identification number assigned by supplier at part level
153 ProprietaryReferenceIdentifier	**1..1**	Definition:	A unique reference identifier for goods, services or business documents.
154 DesignRegistrationIdentification	**0..1**	Definition:	The collection of business properties that describe design registration identification.
155 designRegistrationIdentifier	**0..1**	Definition:	A proprietary unique identifier for a design registration.
		Constraint:	Mandatory when GlobalRegistrationStatusCode is equal to "Approved".
		Note:	Project identification number assigned by supplier at assembly leve
155 ProprietaryReferenceIdentifier	**1..1**	Definition:	A unique reference identifier for goods, services or business documents.

Element / Attribute	Usage	Description	
160 GlobalDesignRegistrationNotificationCode	1..1	**Definition:**	Code identifying the purpose of a design registration notification, e.g. an initial notification or an update.
166 productProviderLeadDescription	0..1	**Definition:**	Description of a lead generated by the product provider and provided to the demand creator.
		Note:	Manufacturer identify opportunity to Disti
166 FreeFormText	1..1	**Definition:**	Unformatted text.
167 productProviderLeadTrackingIdentifier	0..1	**Definition:**	A proprietary identifier communicated from the product provider to the demand creator for the purpose of identifying and tracking supplier generated leads.
		Note:	the manufacturer identified opportunity to distributor
167 ProprietaryReferenceIdentifier	1..1	**Definition:**	A unique reference identifier for goods, services or business documents.
168 RegistrationStatus	0..1	**Definition:**	The collection of business properties that describe the registration status of a product.
		Note:	Registration status on Assembly level
171 GlobalRegistrationStatusCode	1..1	**Definition:**	Code identifying the registration status of a design; namely, the acknowledgment, collaboration and continuation on the submitted supplier part business opportunity between a supplier (manufacture representative) and a distributor.
		Note:	Mandatory assembly status assigned by provider
172 registrationStatusDate	1..1	**Definition:**	The date stamp when the registration status was generated.
172 DateStamp	1..1	**Definition:**	Specifies a specific date. Date stamp based on the ISO 8601 specification. The "Z" following the day identifier (DD) is used to indicate Coordinated Universal Time. Informal format: YYYYMMDDZ
173 DesignProjectDescription	0..1	**Definition:**	The collection of properties describing a product design project description.
174 projectComments	0..1	**Definition:**	Free form textual description regarding a project.
		Note:	Comment from provider to requestor about this project
174 FreeFormText	1..1	**Definition:**	Unformatted text.

Element / Attribute	Usage	Description	
175 productProviderLeadDescription	**0..1**	Definition:	Description of a lead generated by the product provider and provided to the demand creator.
		Note:	Manufacturer identify opportunity to Disti
175 FreeFormText	**1..1**	Definition:	Unformatted text.
176 productProviderLeadTrackingIdentifier	**0..1**	Definition:	A proprietary identifier communicated from the product provider to the demand creator for the purpose of identifying and tracking supplier generated leads.
		Note:	the manufacturer identified opportunity to distributor
176 ProprietaryReferenceIdentifier	**1..1**	Definition:	A unique reference identifier for goods, services or business documents.
177 projectIdentifier	**0..1**	Definition:	Unique tracking identification number that identifies a project.
177 ProprietaryReferenceIdentifier	**1..1**	Definition:	A unique reference identifier for goods, services or business documents.
178 ProjectStatusCode	**0..1**	Definition:	Code identifying the status of a design project.
		Note:	Project status
181 RegistrationRenewableStatus	**0..1**	Definition:	The collection of business properties that describe design registration renewable conditions.
182 isRegistrationRenewable	**1..1**	Definition:	Indicates whether or not the design registration is renewable.
182 AffirmationIndicator	**1..1**	Definition:	Used to indicate "Yes", "No" statements.
183 registrationRenewalDate	**0..1**	Definition:	The date that a design registration is up for renewal.
		Constraint:	Mandatory if isRegistrationRenewable.AffirmationIndicator is equal to "Yes"
183 DateStamp	**1..1**	Definition:	Specifies a specific date. Date stamp based on the ISO 8601 specification. The "Z" following the day identifier (DD) is used to indicate Coordinated Universal Time. Informal format: YYYYMMDDZ
184 registrationSubmissionDate	**0..1**	Definition:	The date a Demand Creator submits the design registration information to a Product Provider.
		Constraint:	Mandatory when GlobalDesignRegistrationNotificationCode is equal to "Update".

Element / Attribute	Usage	Description	
184 DateStamp	1..1	Definition:	Specifies a specific date. Date stamp based on the ISO 8601 specification. The "Z" following the day identifier (DD) is used to indicate Coordinated Universal Time. Informal format: YYYYMMDDZ
185 GlobalFileTransmissionCode	1..1	Definition:	Code identifying whether a file is being re-sent complete or with changes only.
186 fromRole	1..1	Definition:	The role initiating a business document exchange.
186 PartnerRoleDescription	1..1	Definition:	The collection of business properties that describe a business partners' role in a partner interface process.
187 ContactInformation	1..1	Definition:	The collection of business properties that provide communication and address information for contacting a person, organization or business.
188 contactName	1..1	Definition:	Name of the contact person(s) within the organization.
188 FreeFormText	1..1	Definition:	Unformatted text.
189 EmailAddress	1..1	Definition:	Electronic mail address.
191 telephoneNumber	1..1	Definition:	The numerical schema designed to achieve contact via telephone.
191 CommunicationsNumber	1..1	Definition:	The electro-technical communication number, e.g., telephone number, facsimile number, pager number.
192 GlobalPartnerRoleClassificationCode	1..1	Definition:	Code identifying a party's role in the supply chain.
		Constraint:	Only GlobalPartnerRoleClassificationCode equal to "Product Provider" is allowed.
193 PartnerDescription	1..1	Definition:	The collection of business properties that describe a business partners' identity, their contact information, where they are physically located and their function in a supply chain.
194 BusinessDescription	1..1	Definition:	The collection of business properties that describe a business identity and location.
195 GlobalBusinessIdentifier	1..1	Definition:	A unique business identifier. The DUNS number is specified by RosettaNet.
197 GlobalPartnerClassificationCode	1..1	Definition:	Code identifying a partner's function in the supply chain.

Element / Attribute	Usage	Description	
198 GlobalDocumentFunctionCode	1..1	Definition:	Code identifying the function of a document as either a request or a response.
		Constraint:	Only GlobalDocumentFunctionCode equal to "Request" is allowed.
199 thisDocumentGenerationDateTime	1..1	Definition:	The date-time stamp indicating when this business document was generated.
199 DateTimeStamp	1..1	Definition:	Specifies an instance in time. Based on the ISO 8601 specification where "YYYY" represents the year, "MM" the month and "DD" the day. The letter "T" is the date/time separator and "hh", "mm", "ss.sss" represent hour, minute and second respectively. This representation is immediately followed by a "Z" to indicate Coordinated Universal Time. Informal format: YYYYMMDDThhmmss
200 thisDocumentIdentifier	1..1	Definition:	The information that identifies the business document being sent. This identifier is used to represent the specific business document associated with the defined business process.
200 ProprietaryDocumentIdentifier	1..1	Definition:	Unique identifier, i.e. a numeric value or alphanumeric value, for a business document.
201 toRole	1..1	Definition:	The role receiving the document in a business document exchange.
201 PartnerRoleDescription	1..1	Definition:	The collection of business properties that describe a business partners' role in a partner interface process.
207 GlobalPartnerRoleClassificationCode	1..1	Definition:	Code identifying a party's role in the supply chain.
		Constraint:	Only GlobalPartnerRoleClassificationCode equal to "Demand Creator" is allowed.
208 PartnerDescription	1..1	Definition:	The collection of business properties that describe a business partners' identity, their contact information, where they are physically located and their function in a supply chain.
209 BusinessDescription	1..1	Definition:	The collection of business properties that describe a business identity and location.
210 GlobalBusinessIdentifier	1..1	Definition:	A unique business identifier. The DUNS number is specified by RosettaNet.

Element / Attribute	Usage	Description
212 GlobalPartnerClassificationCode	1..1	**Definition:** Code identifying a partner's function in the supply chain.

AffirmationIndicator		**Type** String	**Min** 2
		Repr X(3)	**Max** 3

Definition
Used to indicate "Yes", "No" statements.

Used in

---

Entity Instances

Company Out Of Business	*Company is out of business.*
Competing Registration Present	*Registration for part and customer already exists with another distributor.*
Contact Approver	*Please call to resolve issue with request.*
Contract Manufacturer	*Manufacturing is now serviced by the contract manufacturer, not distribution.*
Customer Requested To Close The Opportunity	*The end customer has asked the product provider to close the registration.*
Design Already Done	*The design has already been completed and therefore the demand creator is not eligible for design registration for this project.*
Design Win Date Must Be A Future Date	*The design win date supplied by the demand creator is in the past and the product provider requires the date to be in the future.*
Duplicate Claim	*A Design Win claim for the same registration has previously been accepted and approved.*
Duplicate Registration	*Registration for part and customer already exists with requesting distributor.*
Expired Design Registration Status	*Project expired and therefore no longer eligible for design registration.*
Insufficient Information	*One or more required data elements was not provided or information in a given data element is incomplete.*
Invalid Company Contact	*The company contact supplied was determined invalid by the product provider.*
Invalid Customer Code	*The product provider cannot identify the customer code or the customer code supplied is invalid.*
Invalid Customer Contact	*The customer contact has been determined invalid by the product provider.*
Invalid Opportunity Attachment	*The opportunity attachment has been determined invalid by the product provider.*
Invalid Opportunity Note Or Comment	*The opportunity note or comment has been determined invalid by the product provider.*
Invalid Part Number	*Supplier cannot identify part number as one of its own.*
Invalid Partner Code	*The partner code has been determined invalid by the product provider.*
Invalid Partner Role	*The partner role has been determined invalid by the product provider.*
Invalid Product	*The product has been determined invalid by the product provider.*
Invalid Product Price	*The product price has been determined invalid by the product provider.*
Invalid Product Quantity Per System	*The product quantity per system has been determined invalid by the product provider.*

Dictionary Elements

Version: 5C4_RegistrationStatusNotification; V01_04_00; ED01

Entity Instances

Invalid Projected Sales Quantity	*The projected sales quantity has been determined invalid by the product provider.*
Lost Design	*Design has been lost and is therefore no longer eligible for registration.*
Multiple Distributors Give Support	*Multiple demand creators are providing support for this project and therefore it is not eligible for design registration.*
No Commercial Relation	*The demand creator submitting the design does not have a valid commercial relationship (e.g., franchise agreement) with the product provider.*
No Distributor Field Application Engineer	*The demand creator no longer has a field application engineer supporting the project.*
No Engineer Services Required	*The customer or design does not require technical investment of resources and therefore the registration is deemed invalid by the product provider.*
Not A Registerable Part Number Or Part Number Not Eligible For Registration	*Part number is a good supplier part, but is not eligible for registration.*
Not A Valid Customer Project	*The customer project has been determined invalid for design registration.*
Not Supported By Distributor	*The product provider has determined that this registration is invalid because it is not being supported by the demand creator.*
Opportunity Attachment Too Large	*The opportunity attachment has been determined to be too large by the product provider.*
Part Number Not In Price Book	*Some suppliers require that a part be in the price book before issuing a registration.*
Production Win Date Must Be Future Date	*The production win date supplied by the demand creator is in the past and the product provider requires the date to be in the future.*
Project Cancelled By Customer	*The customer has cancelled the project for this design registration.*
Project Delayed By Customer	*The customer has delayed the project for this design registration.*
Project Safety Not Green	*The use of the part in this particular project does not meet the product provider's eligibility requirements for design registration.*
Quantity Metric Not Met	*Quantity of parts required to satisfy Design Win threshold requirement has not been met.*
Registration Number Is Not Valid	*Supplier cannot identify register number with any valid register numbers for that distributor.*
Required Fields Incomplete	*Minimum fields of information required by supplier was not met.*
Resale Inactivity	*Registration was in production win status, but there have not been sufficient resales to keep it active.*
Sales Metric Not Met	*Dollar sales volume required to satisfy Design Win threshold requirement has not been met.*
Under Review	*Design registration request has not completed the review process.*
Value Not High Enough	*Value of opportunity does not meet minimum requirements for registration.*
Wrong Customer Name	*Customer name does not match name on existing registration.*

GlobalPartnerRoleClassificationCode	**Type** String	**Min** 1

Definition
Code identifying a party's role in the supply chain.

Entity Instances

Account Supplier	*Any trading partner that buys or sells products/services from customers and/or vendors.*
Account User	*Any trading partner that requires an account to buy or sell*

Entity Instances

	products/services.
Anonymous Buyer	*A requestor of information that chooses to remain anonymous.*
Appointment Provider	*The stakeholder(s) in the shipment delivery activity.*
Authorized Service Provider	*The Service Provider authorized by an OEM to perform service on a unit.*
Authorizer	*The partner role that provides product authorization, from a product owner or manufacturer, for a reselling organization to resell a product.*
Buyer	*An employee or organization that buys products for a partner type in the supply chain.*
Catalog Distributor	*The partner role that distributes catalog information to catalog producers and buyers.*
Catalog Producer	*The partner role that produces catalog information for a partner type in the supply chain.*
Change Requester	*A party who has an interest in requesting a review of a possible change to the component. The requester may be any party including customers and suppliers.*
Change Review Forum	*A party who has responsibility for the review of Engineering Change Requests and the drafting and review of Engineering Change Orders. The Change Review Forum is assumed to be at the company that has responsibility for the engineering aspects of the component affected by the change.*
Claim Requester	*The owner of the shipments who is responsible for the intact delivery.*
Consignee	*The receiver of the shipment.*
Consumption Notification Provider	*Trading Partner role responsible for sending the notification of material consumption by a production location*
Consumption Notification User	*Trading Partner role responsible for receiving and processing the notification of material consumption thereby invoicing the customer for consumed material*
Credit Provider	*This partner role is responsible for providing credit information about potential customers.*
Credit Reference Requester	*This partner role is responsible for requesting credit information about potential customers.*
Customer	*This partner role creates a demand for a product or service.*
Customer Manager	*This partner role manages the relationship with the business customers.*
Decision Stakeholder	*The party (such as suppliers, customers and others) who is responsible for the review and approval of the Engineering Change Approval Request. The stakeholders may be from multiple organizations.*
Delivery Appointment Provider	*A party that receives a request for a change to a previously scheduled delivery appointment.*
Delivery Appointment Requester	*A party that requests a change to a previously scheduled delivery appointment.*
Demand Creator	*The partner role that identifies the opportunity, submits design registration, provides engineering support to advance the opportunity towards design win, and generates revenue by satisfying customer demand for a product.*
Design Engineering Information Receiver	*This partner role uses technical information for updating enterprise databases (such as electronic catalog systems), design or test engineering, and manufacturing.*
Design Engineering Information Sender	*This partner role distributes the design engineering information of the agreed types in the agreed amounts at the agreed times.*
Exception Identifier	*The party/organization that monitors and identifies exceptions based on predefined exception criteria and sends notifications of the identified exceptions. In a collaborative forecasting process, the Exception Definer may be the Forecast Owner, Forecast Recipient,*

Dictionary Elements

Entity Instances

	Forecast Reply Recipient and/or an external party.
Exception Recipient	*The party/organization requiring visibility to an exception and receiving notifications on the identified exceptions. In a collaborative forecasting process, the Exception Recipient may be the Forecast Owner, Forecast Recipient and/or Forecast Reply Recipient. The Exception Identifier may send a notification for a specific exception to multiple Exception Recipients.*
Failure Report Administrator	*An employee or organizational entity that receives and processes PIP Failure Notifications.*
Financing Processor	*The organization that processes the request for financing.*
Forecast Owner	*The party/organization that monitors and identifies exceptions based on predefined exception criteria and sends notifications of the identified exceptions. In a collaborative forecasting process, the Exception Identifier may be the Forecast Owner, Forecast Recipient, Forecast Reply Recipient and/or an external party.*
Forecast Recipient	*The party that receives a strategic or order forecast.*
Forecast Reply Recipient	*The party that receives a forecast reply. The Recipient can be the original forecast owner or other forecast partner (Please refer to the GlobalPartnerClassificationCode).*
Implementation Plan Creator	*The partner role that creates, maintains and manages an implementation plan associated with an Engineering Change Order.*
In-transit Information User	*The party who receives shipment status information.*
Initiator	*The party that starts the data exchange.*
Integrator	*The organization responsible for the production of the product. Change requests are communicated back to the Qualification Owner.*
Inventory Information Provider	*An organization that owns or holds inventory and provides information about this inventory to partners in the supply chain. This may be a distributor, contract manufacturer, supplier or OEM reporting inventory that they hold and/or own.*
Inventory Information User	*An employee or organizatrion that uses information about inventory.*
Invoice Provider	*The organization that generates the invoice.*
Invoice Receiver	*The organization being invoiced.*
Invoice Reject Provider	*The organization that rejects an invoice.*
Invoice Reject Receiver	*The organization being issued an Invoice Reject Notification.*
Marketing Activity Information User	*The party who uses information about Marketing Activities. This party might include distributors, and retail operations.*
Marketing Activity Initiator	*The partner role that distributes information about marketing activities being sponsored by the organization.*
Material Release Information Provider	*Trading Partner role responsible for triggering release of materials to a delivery location*
Material Release Information User	*Trading Partner role responsible for receiving trigger to release material to a delivery location and shipping material to delivery location*
PIP Failure Notifier	*An organizational process that automatically notifies the appropriate Failure Report Administrator of a PIP process failure.*
Payee	*The party receiving a payment.*
Payer	*The party issuing a payment.*
Product Distributor	*The party authorized by a Product Supplier to purchase goods and services from the Product Supplier and resell to customers.*
Product Information Distributor	*The partner role that distributes new product information to product information users and buyers.*
Product Information Subscriber	*The business partner that subscribes to product information from other business partners.*
Product Information User	*The partner role that uses product information to create or update enterprise systems and online promotion systems such as electronic catalog systems.*

Entity Instances

Product Provider	*The partner role that creates a differentiated product, owns the registration process and creates a list of eligible products for use in design registration.*
Product Supplier	*This partner role supplies product to customers in the supply chain.*
Qualification Owner	*The organization responsible for the qualification of manufacturers and suppliers of parts for the product. The Qualification Owner defines and maintains the AML for the product.*
Quality Data Provider	*The party responsible for sending the Repair Quality Data. The Provider, through various means, learns of product or product component defect(s).*
Quality Data User	*The party who receives the repair and/or test data. The User analyzes the data and incorporates findings into its business model.*
Receiver	*The intended recipient of products or business information. The Receiver may verify receipt if prescribed.*
Responder	*The party that replies to the initiators message.*
Return Provider	*The party responsible for authorizing and/or processing the return.*
Return Receiver	*A third-party or warehousing operation responsible for receiving returns, inspecting the package contents and comparing to the issued RMA to assure the contents are what was authorized on the RMA.*
Return Requester	*Any party wishing to return a product. This role could be played by a large end-user such as the Government Services Administration (GSA), a distributor, or a reseller.*
Sales Facilitator	*This partner role facilitates the sale of product between partners in the supply chain.*
Sales Lead Originator	*The party assigning a sales lead to another party.*
Sales Lead Processor	*The party who receives the sales lead. This party is responsible for accepting or rejecting the lead, and if accepted, reports the status of the lead.*
Sales Marketing Claim Processor	*The partner role that processes the claim and/or remits compensation to the Sales Marketing Claimant.*
Sales Marketing Claimant	*The partner role that requests reimbursement from a Sales Marketing Claim Processor.*
Sales Marketing Program Reimbursement Recipient	*The partner role that receives status on a previously submitted sales marketing claim, or who receives reimbursement without submitting a claim.*
Sales Marketing Program Reimburser	*The partner role that is currently processing a sales marketing claim, (or providing a payment without a claim submitted) and who provides information on the status of the claim processing.*
Self-Billing Invoice Provider	*The party that generates the self-billing invoice plus being invoiced. It can re-issue the self-billing invoice.*
Self-Billing Invoice Receiver	*The organization that provides the services or goods. The organization that receives the payment.*
Seller	*An organization that sells products to partners in the supply chain.*
Service Provider	*A provider that performs a service such as repair, diagnose, maintain, install or remove on a unit.*
Shipment Information User	*The party who receives shipment status information.*
Shipment Requester	*The party requesting transportation services.*
ShipmentController	*The party who is authorized to make decisions regarding a shipment while in-transit.*
Shipper	*The party who relinquishes (assigns) a shipment to a transport service provider.*
Shipping Provider	*The organization responsible for performing the shipping logistics for the Shipper. The Shipping Provider ships products from one location to another as requested by the shipping order and informs the Shipper when the shipment has been sent.*
Solution Provider	*The party that may architect, configure, engineer, sell, or determine the fulfillment of the configured solution to partners in the supply*
